

A New Health Care Solution for Employers— from Proven Experts in Pediatric Care.

Today's employers must attract and keep the best employees with quality health plans, while at the same time working to control costs. The Children's Health Pediatric Alliance is introducing a new solution to meet this challenge. We bring together the leading North Texas pediatric medical center and health system with an independent pediatric provider network to improve the quality and efficiency of care delivery while enhancing the patient experience and reducing the total cost of health care. As one of the nation's only pediatric Accountable Care Organizations (ACO), we're focused on collaboration and innovation in new ways for a better model of pediatric care.

Comprehensive

- Employees appreciate the value of having access to a more comprehensive network of pediatric expertise in everything from primary care to specialists, advanced care and wellness. This is achieved by connecting with the pediatric innovations and delivery systems of Children's Health.
- Our extensive provider network is composed of the entities that make up Children's Health including Children's Medical Center and its affiliates, Children's Health Specialty Centers, Children's HealthSM Pediatric Group and Pediatric Partners, a network of independent primary care and specialist providers. Our purpose is to provide a collaborative environment for physicians and hospitals to align and improve the efficiency, quality and cost of health care.
- Our physician-led system is focused on achieving integration, coordination and improved care delivery in North Texas and beyond.

Cost-Efficient

- We have built an innovative model with the unique ability to enter into different value-based pediatric contracting agreements. Reimbursements align directly with the quality of care and outcomes achieved.
- We focus on disease management and lifestyle programs dedicated to empowering patients and families. This approach lowers the total cost of care by improving outcomes through family education and physician engagement.
- The Pediatric Alliance brings expertise in care coordination. The result includes less duplication of services, reduction in unnecessary utilization and prevention of avoidable emergency room visits.

Happier, Healthier Employee Families

- From advanced care to wellness services that improve quality of life at home, employees will value the vast resources of a world-class pediatric organization like Children's Health.
- We build a better patient experience with convenient access to expertise through these innovations, such as:
 - School-based telemedicine.
 - New technologies to improve disease management and patient compliance for complex care needs, including asthma, obesity and behavioral health.
 - 24/7 access to the Children's Health Nurse Advice Line staffed by experienced pediatric nurses to guide families to the appropriate care resources.

Employees want convenient access to quality care—especially for their children. Quality pediatric care means more than just better productivity, it's the right thing to do for your employee families. Contact your Children's Health Pediatric Alliance Employer Liaison at **214.456.5252** or at **ACO@childrens.com** to learn about this solution and the difference it can make to employers and their employees.
