

Quality Initiatives

A NEW HEALTH CARE SOLUTION FOR EMPLOYERS

Today's employers must attract and keep the best employees with quality health plans, while at the same time working to control costs. The Children's HealthSM Pediatric Alliance is introducing a new solution to meet this challenge.

We bring together Children's Health, a leading North Texas pediatric health system, with an independent pediatric provider network to improve the quality and efficiency of care delivery. This collaboration enhances the patient experience while reducing the total cost of health care. As one of the nation's only pediatric Accountable Care Organizations (ACO), we're focused on innovative approaches for a better model of pediatric care.

Pediatric Alliance allows adult organizations to complete their offerings for the entire family by adding a pediatric ACO with an integrated group of doctors, hospitals and other health care providers unified to provide high-quality care to children. Contact us for more information on how you can ensure the Pediatric Alliance is part of your network.
