

Ray Tsai, MD, MBA

Co-Medical Director

Dr. Tsai's expertise in risk management and population health comes from hands-on experience—This knowledge was gained from caring for patients at a grassroots level and from his experience as a leader of a pediatric network.

Dr. Tsai holds a Bachelor of Arts in Environmental Sciences from Northwestern University, a Doctor of Medicine from the Feinberg School of Medicine at Northwestern University, and a Master of Business Administration from The Wharton School of the University of Pennsylvania. He completed his residency in pediatrics from Georgetown University Hospital.

As the Medical Director of Children's Health Pediatric Group, Dr. Tsai has led the expansion of this medical home for children from one practice to more than 15 in less than two years. His expertise in healthcare delivery for underserved populations, clinical information technology, quality improvement methods in primary care settings, and risk management were a key contributor to this growth. This network continues to grow, with plans for continued expansion to better serve children throughout North Texas.

In addition to his leadership role, Dr. Tsai treats patients at Children's Health Pediatric Group clinics and provides inpatient service at Children's Health.

Dr. Tsai's experience from the forefront of pediatric population health challenges help him lead the Pediatric Alliance's clinical efforts and continue his mission to serve the children of his community.
