

Primary Care Pediatrician

WHY SHOULD I CHOOSE A PRIMARY CARE PEDIATRICIAN?

There is nothing more important to you than your child. In today's health care setting, having someone that you can trust is of the utmost importance.

A Primary Care Pediatrician is there for you when you need someone that:

- Has an established relationship with you and your child
- Knows your child's health history from when immunizations were administered to when they had a surgery.
- Understands and listens to you
- and your child's concerns and needs
- Collaborates with you to develop a care plan for your child when needed
- Provides after-hours support when you need medical assistance
- Is focused on the care that your child needs
